

Take Control of Your Air Quality

For over 50 years, businesses like yours have relied on Air Quality Engineering (AQE) to create cleaner air and improve operational efficiency.

We partner with distributors, dealers, and their customers—engineers, facility managers, and operations leaders in manufacturing, restaurant, and commercial settings—who need durable products they can count on. Whether you need to eliminate harmful airborne contaminants, meet regulatory compliance, or enhance workplace conditions, AQE provides the solutions to help you achieve your goals.

Achieve Cleaner Air

You need air filtration solutions that work reliably and efficiently. Since 1969, AQE has helped businesses across industries take control of their air quality with a variety of proven products. Our expert team works closely with distributors and industry professionals to ensure you get the right technology for your specific needs. As an employee-owned company, we focus on delivering long-term solutions that support your success.

How AQE Helps You Succeed

Solve Your Air Quality Challenges

Engineers, facility managers, and business operators trust AQE to eliminate airborne contaminants, improve indoor air quality, and ensure compliance with solutions designed for their industry.

Maximize Efficiency & Savings

Our high-performance systems reduce maintenance costs and extend equipment life, providing long-term value to businesses and their partners.

Depend on a Trusted Partner

AQE partner with distributors and dealers to equip professionals with expert guidance and reliable filtration solutions that meet their operational needs.

The Results You'll See

Partnering with AQE means cleaner air, improved work conditions, and more efficient operations. Our advanced filtration technology removes pollutants, helps you meet industry regulations, and reduces costly downtime—so you can focus on running your business with confidence.

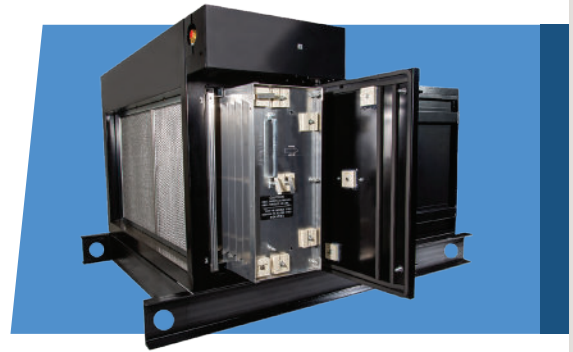

Industrial Air Filtration

- Reduce mist and fumes in CNC machining and metalworking
- Improve air quality in welding and dust-heavy environments
- Capture airborne contaminants at the source

Kitchen Exhaust Solutions

- Remove grease, smoke and odor from commercial kitchen exhaust
- Optimize space with industry leading compact, high-efficiency filtration
- Certified to all relevant UL requirements throughout the USA
- Benefit from best-in-class self-washing performance for reduced maintenance costs

Commercial & Hospitality Solutions

- Eliminate smoke and odor for bars, casinos, and hospitality spaces
- Enhance guest comfort with HEPA and carbon filtration
- Reduce operating costs with energy-efficient air cleaners

Working with Air Quality Engineering has been an exceptional experience. Their commitment to on time delivery, quality and service are critical to our success. Everyone at Air Quality Engineering understand what partnership truly means, and they are not afraid to take an extra mile to fulfill our needs.
